

SEE WHAT OTHERS ARE SAYING ABOUT AFRICAN ANCESTRY

The information African Ancestry provided to me has given me an anchor to my past, thus making my present all the more valuable and precious to me. And that self-knowledge gives me power. I know my lineage and the history of MY PEOPLE.

KIMBERLY ELISE - ACTRESS

We all should know where we come from, this way we'll know where we're going. It gives you a sense of pride and definition as to who you are, it is the one thing that can't be taken from us. Sacrifice and take the plunge and make your find, we did and it is something to pass to the family members.

AFRICAN ANCESTRY
FAMILY MEMBER

I am moved more than I ever thought I would be. We are empowered by details, and this small fact is a significant detail in my life, and brings with it such inner dignity.

JOHN HOPE BRYANT
ACTIVIST, AUTHOR AND
FOUNDER OF
OPERATION HOPE

Discovering my African roots was - hands down - the most transformative event in my life and African Ancestry was like a passionate, capable tour guide during the journey. Their guidance and expertise enhanced my experience every step of the way.

SHERYL LEE RALPH
ACTRESS, ACTIVIST,
AUTHOR

From childhood to adulthood, my past only whispered truth upon truth and now I have the scientific proof to attest for it! Nigerian-Ghanian American, no longer just a generic African-American!

**THIS IS WHERE YOUR
JOURNEY BEGINS**

UNLOCK YOUR PATERNAL ROOTS, MATERNAL ROOTS AND ANCESTRAL MAKEUP WITH AFRICAN ANCESTRY.

DISCOVER YOUR PATERNAL AND MATERNAL ROOTS

You know you come from Africa, but can you claim a specific ancestral homeland? You may know some of your family history in the United States, but not where your bloodlines and true roots originated.

Since 2003, African Ancestry has reconnected tens of thousands of people with their African roots. African Ancestry is the only company that traces your ancestry back to a specific present-day African country and ethnic group of origin when African ancestry is found.

With the industry's largest and most comprehensive database of over 30,000 indigenous African samples, African Ancestry determines specific countries and—more often than not—specific ethnic groups of origin with an unrivaled level of detail, accuracy and confidence.

African Ancestry is not always found. If the results are from another continent, that information will be provided.

THE PROCESS IS SIMPLE, PAINLESS AND PROFOUND.

ORDER

Purchase your maternal and/or paternal test kit from our online store. You'll receive your test kit within 7 – 10 business days.

TEST

When you receive your test kit, simply swab the inside of your cheek using the swabs provided and return your DNA sample in confidential packaging, via the prepaid envelope supplied.

ANALYSIS

Once we receive your DNA sample, our laboratory extracts your DNA's genetic sequence. Then scientists compare your sequence to the largest database of African genetic sequences in existence.

RESULTS

Approximately 6-8 weeks after you submit your DNA sample, you'll receive your results package with your Certificate of Ancestry, and our Guide to African History and Cultures.

YOUR DNA SAMPLE IS KEPT COMPLETELY CONFIDENTIAL.

Every sample in our lab is identified by a bar code and no personal information is shared.

MATRICLAN TEST

Find your roots on your mother's side from more than 500 years ago. The MatriClan Test traces maternal ancestry by analyzing the mitochondrial DNA (mtDNA) women and men inherit exclusively from their mothers. Men AND women can take this test.

In fact, you share the same mtDNA as your mother, grandmother, great grandmother and so on. Therefore, your results are the same for your siblings, maternal aunts and uncles, maternal cousins, etc.

For women, your results are also the same for your children and your daughter's children.

PATRICLAN TEST

Find your roots on your father's side from more than 500 years ago. The PatriClan Test traces paternal ancestry by analyzing the Y chromosome men inherit exclusively from their fathers.

Since only men carry a Y chromosome, women CANNOT take the PatriClan Test. But luckily, women may trace their paternal lineage by having a male relative from their father's side take the test for them.

The results of his PatriClan Test will be the same for his father, grandfather, children, siblings, brother's children, paternal aunts and uncles, etc.

TRACE YOUR DNA. FIND YOUR ROOTS. TODAY.
